Hog Cutting Instructions at Smucker's Meats

Cutting Instructions

In order to maintain production efficiencies and minimize errors, all cutting instructions for hogs that are slaughtered at this facility must be submitted by 4pm on Monday. We will no longer accept cutting instructions on Tuesday or Wednesday of the week that the hogs are slaughtered. Any hogs that do not have instructions submitted by 4pm on Monday, the cutting order will be duplicated from a prior order, without exception. We will no longer call for instructions after Monday and if we do not have prior instructions on file, a generic cutting order will be used that includes cutting and processing options generally requested by the majority of our clients. Our goal is to do the best job possible and having cutting orders in a timely manner has been proven to be essential to achieving this goal.

Half Hog Instructions

Hog instructions must also be submitted as one or more whole hogs per order. We will not create work orders for increments less than one whole hog. The whole hog will be cut under one work order and will need to be divided by the customer.

We thank you for your cooperation in this vital step of our service to you
